

Session 10:

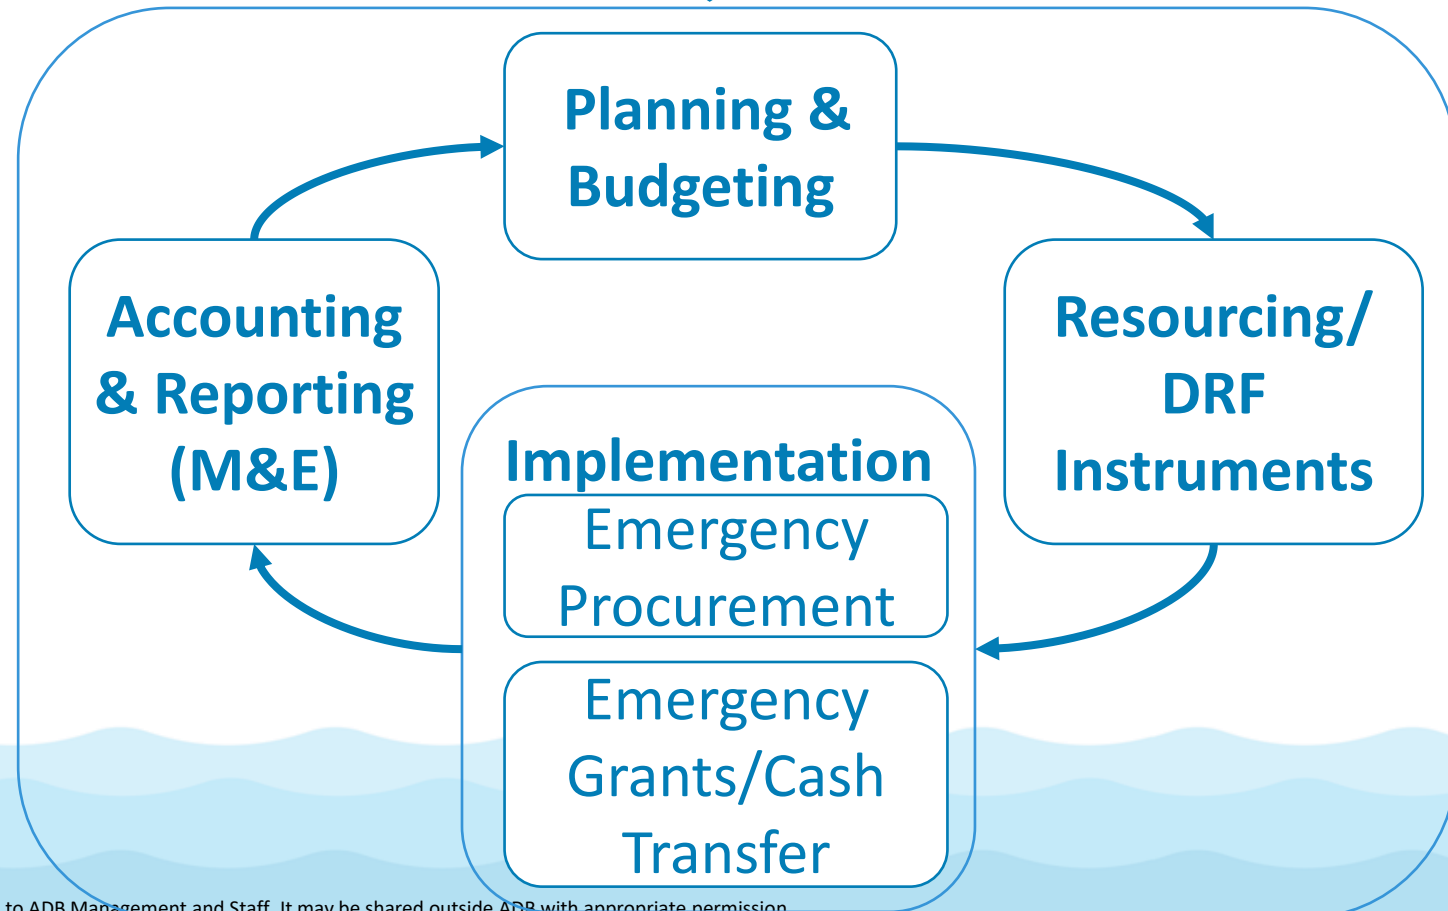

Mainstreaming DRF in Public Financial Management

Workshop on Climate and Disaster Risk Finance in the Pacific 2025
17th – 21st February 2025

Public financial management helps operationalize DRF

- PFM refers to the laws, institutions, systems and processes by which public resources are planned and managed
- DRF is not a standalone mechanism and needs to be integrated into broader fiscal frameworks and linked to disaster risk management functions
- The PFM cycle provides a structured approach to managing public resources and is operationalizing DRF and disaster risk management

Overarching Frameworks, Institutional Arrangements, Guidance & Capacity

Case Studies & Group Work

Guiding questions for group work

- How can we overcome possible gaps between NDMOs and MoF to resource disaster response, recovery and reconstruction?
- What challenges are there to an accountable use of DRF and how can these be addressed?
- What are some challenges to disburse and use funds in a way that is timely and provides the best value/ addresses key needs of affected communities? Solutions?
- Are institutional arrangements and capacity adequate to promote better resourcing and management of DRF? Where are the gaps and how can these be addressed?

Thank you
